October 2003

Dear Wisconsin Educator:

As the contractor for the Wisconsin Knowledge and Concepts Examinations (WKCE), CTB/McGraw-Hill is pleased to offer the following optional products for your district. These products are considered additional to the state's standard reporting package and will be at the school's or district's expense. Optional products will be sent several weeks after your standard reports are received. Please review the descriptions below to determine if any of these reports would be useful to your district.

- ◇ **Student Label** – This label provides student data from the Individual Profile Report in a format that can easily be attached to the student's permanent file for future reference. Where appropriate, results for all content areas are reported in terms of the Wisconsin proficiency levels as well as norm-referenced scores. Writing holistic scores are not included on this label.
- ◇ **ReportMate Clarity** – Software allows you to access *TerraNova*®, CAT®, SABE®, CTBS®, InView®, and Supera® achievement test results and create custom reports using standard norm-referenced and aptitude score types. You can restructure test information to meet local reporting needs at any time during the school year.
  - **Report Mate Clarity Basic** – helps you reorganize test results into new groupings and provide sorting and ranking facilities.
  - **Report Mate Clarity Longitudinal** – adds the ability to accumulate information over time and to track progress. This option enables you to analyze longitudinal, pre- and post- test, and sustained effects studies.
  - **Report Mate Clarity Advanced** – adds Data Exchange feature.
- ◇ **General Research Diskette** – Data is identical to the GRT (above), but in diskette form. The diskette (Wisconsin layout) provides student test data from the *Wisconsin Knowledge and Concepts Examinations*. Data format is standard ASCII fixed-length format only, ready for importing into personal computer spreadsheets, databases, word processors, and charting packages.
- ◇ **Classroom Connections to TerraNova** – Designed for teachers to use as a resource guide, Classroom Connections creates a valuable link between assessment and instruction. Each binder contains model test items, practice materials, and classroom activities, as well as teaching strategies, including background information, explanations of content terminology, illustrations of item formats, and keys to effective utilization of test information. Objectives are clearly described and assessment examples are easily used to communicate with parents, students, and colleagues. Provided in convenient 3-ring binders, each covering two successive grade levels. (Available in Grades 2-3, 4-5, 6-7, or 8-9)
- ◇ **Teacher's Guide to TerraNova** – This comprehensive guide to *TerraNova, The Second Edition* helps teachers understand assessments, how to plan for and administer tests, the rationale and goals of each content area, and how reports can be interpreted and used to facilitate teaching and learning. Included are detailed explanations of items and how they are applied in each content area at each test level. Samples of score reports and how to read them are also included in the guide.

We have included an order form for these additional products. Simply complete the form and return by mail or fax on or before March 5, 2004. Shipping and handling charges will be added to your order. If you have questions about any of these optional products, please contact CTB's Evaluation Consultant for Wisconsin, Stephen Marsh, at (608) 825-7999.
